

Chemicals

The screenshot displays the IQ LINK interface for chemical management. At the top left is the IQ LINK logo. To the right are buttons for 'Feedback' and 'Main Menu'. Below the logo is the 'Chemicals' section with a search bar and a 'Search Again' button. The search results are for 'ACID' and list six items, each with a color-coded circle, name, manufacturer, and 'Report' and 'MSDS' buttons. At the bottom, there are navigation arrows and 'Page 2 of 3'.

Item Name	Manufacturer	Report	MSDS
0.025M SULPHURIC ACID	ABC	Report	MSDS
0.02N SULPHURIC ACID	Home Brand	Report	MSDS
0.02N SULPHURIC ACID (NZ)	Black & Gold	Report	MSDS
0.02N SULPHURIC ACID (PRODUCT OBSOLETE)	Home Brand	Report	MSDS
0.01N SULPHURIC ACID	Home Brand	Report	MSDS
0.3N SULPHURIC ACID (NZ)	Home Brand	Report	MSDS

Chemical information for the rest of us.

The use of hazardous materials is essential in most workplaces; failure to handle these materials safely is a leading cause of injury on site.

Many full-featured systems now exist for cataloguing and managing chemicals and their related material safety datasheets (MSDSes) on site.

Chemicals connects to RMT ChemAlert and makes MSDS and summary reports available to your entire workforce both from their PCs and any IQ LINK kiosk, so you don't need a degree to stay safe at work.

YOUR SYSTEMS, SIMPLIFIED

Your workforce shouldn't need a supervisor to find a chemical.

Chemicals allows everyone on site to find important safety information about hazardous materials themselves.

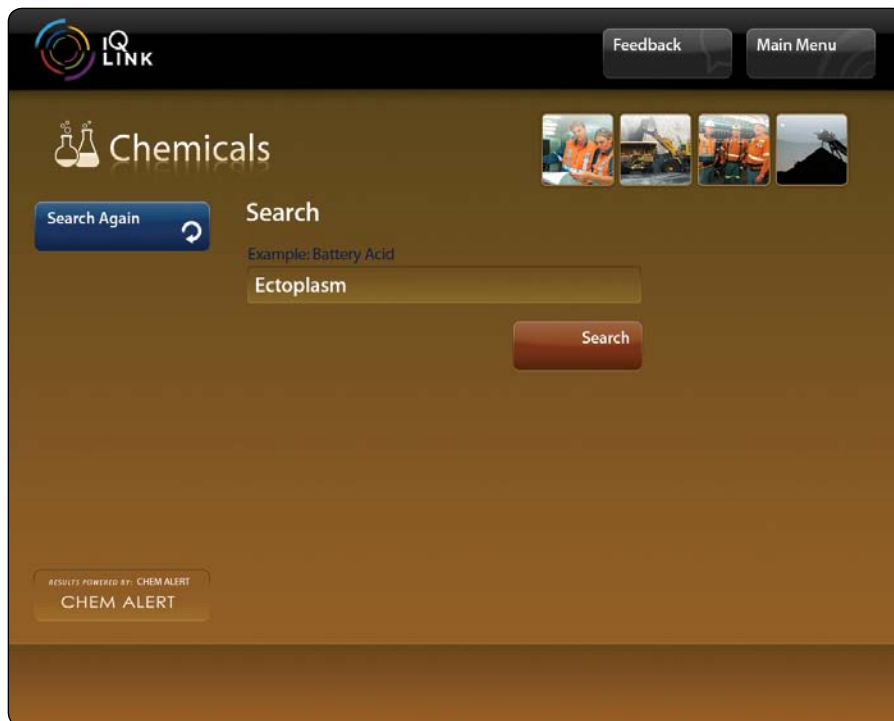

Get the most out of your investment by making sure your users don't need to have a degree to access the safe handling information for substances on site.

Chemicals leverages the power of your existing chemical register without the confusion so your workforce can view and print MSDS and other chemical reports without being trained and without interrupting people who are.

Information such as chemical identification, hazard identification, first aid, flammability and personal protective gear can all be accessed in the one simple to use interface.

KEY FEATURES

- Increase site safety by providing MSDS and summary reports to all your employees.
- Reports can be viewed on screen or printed easily without having to know how to use a computer.
- Chemicals can warn users if a chemical they're looking for has not been registered for use on site.
