Video Memos

Create New Video Memo

0:00 / 3:00

Record

Stop leaving sticky notes!

Video Memos makes it easy for anyone on site to quickly record a short video from any PC or IQ LINK kiosk using a built-in camera.

Once your message has been recorded, it is then listed with a thumbnail for others to view from any PC or IQ LINK kiosk.

Video Memos stores messages centralised for each site, so recipients can view the memo from anywhere on site. No more missed messages, and no paper wasted.

YOUR SYSTEMS, SIMPLIFIED

Some things can only be said face-to-face.

Video Memos lets your workforce interact face-to-face even when they're on different shifts.

Allow messages to be sent and received at different places on site to prevent unnecessary movement and double-handling.

Leaving and retrieving messages during shift change has never been easier.

KEY FEATURES

- Allows users to find, view and record memos regardless of computer literacy.
- Thumbnails make it easy to find specific videos in a list.
- Audio and video means your communication benefits from tone, gesture and expression, and allows for simple demonstration.
- Memos are shown large in a simple viewer to allow multiple people to watch on the same kiosk.
- Memos are recorded and logged for future reference.
- Allow simple video communication between kiosks at different locations on site.
